

Lab 2:

Share Pictures between Smart phones!

Due Nov. 7;

Build up the development environment on Android mobile platform and implement an App that can share pictures between mobile-phones.

For example, the App should have the function to show same picture on at least 2 phones, and each phone should show one part of the picture at the same time.

PS:

Everyone need to submit

Things to upload include :

1. the apk file
2. photos of your demo such as two phones showing the same picture
3. documents with brief introduction of your implements and how to use it

upload your works to elearning (.../作业/lab2提交)
